### Research Projects

Together with the Van Project Group within UCEAT Chamber of Architects, Ankara Section Van Project, which is both a research project and an architectural project, is realized. The sponsor of the project was the Turkish Republic. One of the members of the research group was Yonca Al (Hürol). (1996)

During this research the families, who migrated to Van, were identified and for this purpose a method was developed. This method was developed with the help of interviews with the local architects and it is called “the method of reading spatial indicators of technological disasters.”
